INTRODUCTION OF ADDITIONAL PAYMENT METHOD NOTICE 40 OF 2017

CIPC strives to improve customer service. As part of the process, CIPC will be introducing an additional payment method. In terms of this new payment method, customers will be allowed to use debit and credit cards directly after selecting a service on its website www.cipc.co.za. Formal introduction of the payment method and affected services will be communicated closer to the time of introduction.

This payment method will be introduced gradually over the coming months by adding more and more electronic services onto this payment platform. The current payment platform, where customers make bulk deposits into a customer code and transactions being deducted as and when a service is used, will be phased out.

The first service for which the payment solution will be implemented, is annual returns. Kindly refer to the next pages for a brief step by step guide on how the solution will be implemented for annual returns.

Benefits of the new payment solution

- Payment for services will be immediate;
- Payment is aligned to a specific service or services, which has the additional benefit that a single payment may be made for multiple services;
- No more misallocated or unallocated payments;

Customers will pay the exact amount for the specific transaction;

As this payment method is phased in for specific services, the payment method for the remaining services will continue as normal.

For further enquiries, kindly log a ticket via www.cipc.co.za / enquiries. Select the department as Finance and the category as Cards Payments.

Kind regards,

Rory Voller

CIPC: Commissioner

CIPC is dedicated to providing secure online payment methods. That's why we've added an extra level of security for Visa and MasterCard payments, which protects you from the unauthorized use of your card. 3D Secure technology consists of the programs Verified by Visa and MasterCard SecureCode. After you enter your card details, a new window will appear, requesting your personal security code. Your bank will authenticate the transaction within seconds, as well as confirm that you are the individual making the purchase. If you haven't yet registered with Verified by Visa or MasterCard SecureCode, you'll need to activate this feature first with your bank.
